

KEELEY HOME CARE LLC

Clinically-Led Attendant Care & High-Acuity Supervision

CORPORATE PROFILE

Keeley Home Care LLC is a professional provider of non-skilled personal care and safety supervision for individuals recovering from catastrophic injuries, including Traumatic Brain Injury (TBI) and Spinal Cord Injury (SCI). Under the leadership of a BSN-Registered Nurse, we provide high-standard attendant care specifically designed for the Workers' Compensation and Auto No-Fault insurance markets.

Strategic Advantage: As a professional agency, our services are exempt from the Michigan 56-hour weekly cap on family-provided care, allowing for seamless 24/7 coverage.

CORE COMPETENCIES

- **Safety Watching:** Continuous supervision for clients with confusion or memory issues to ensure a safe environment and behavioral redirection.
- **Daily Living Support:** Direct help with bathing, dressing, grooming, and toileting (ADLs).
- **Steadying Assistance:** Providing physical support during walking and movement to help mitigate the risk of falls.
- **Verbal Medication Reminders:** Prompting clients to ensure the timely self-administration of medications.
- **24/7 Staffing Stability:** Professional capacity to anchor high-hour cases with consistent, long-term personnel.

THE AUDIT WALL GUARANTEE

We prioritize administrative transparency and payer security. Our documentation utilizes plain, non-clinical language to ensure clear boundaries between attendant

care and skilled services, protecting the "Audit Wall" for every claim.
